About The Canadian Chrome Company:

KWG, which carries on business as The Canadian Chrome Company, is the owner of 100% of the Black Horse chromite project (formerly part of Fancamp’s “Koper Lake-McFaulds” properties) in which Bold Ventures Inc. is carried through exploration of the former Fancamp claims for 10% of the chromite project. KWG also holds other area interests including a 100% interest in the Hornby claims, a 15% vested interest in the McFaulds copper/zinc project and a vested 30% interest in the Big Daddy chromite project. KWG also owns 100% of Ring of Fire Transportation and Utilities Inc. (“ROFTU”) which staked mining claims between Aroland, Ontario (near Nakina) and the Ring of Fire. ROFTU has conducted a surveying and soil testing program to assess the prospects for the engineering and construction of a railroad along that route between the Ring of Fire and Aroland, Ontario covering the claims staked by ROFTU. ROFTU engaged Cormorant Utilities and Rail-Veyor Technologies for Engineering Proposals for the construction of a transportation and utility corridor within the route and has received those proposals. KWG has also acquired intellectual property interests, including a method for the direct reduction of chromite to metalized iron and chrome using natural gas. KWG subsidiary Muketi Metallurgical LP has acquired two chromite-refining patents in Canada and one in each of the USA, South Africa and Kazakhstan, and is prosecuting an application in Turkey.
